

„The basis of our existence is the right diet“

bewi dog® puppy milk gives them a perfect start in life

The first few days of life are important for the healthy development of your puppy.

benefits:

- Rich in minerals
- Adapted to the natural composition of dog milk
- Targets the compensation of any deficits of the whelps (vitamins, minerals)

ingredients:

Milk and dairy products; Oils and fats; Vegetable by-products; Minerals

feeding recommendation:

Recommended quantity of food per animal in grams/day

Whelps require approximately 15g of **BEWI DOG®** puppy milk drink per 100g of body weight (= for 1 kg of body weight, feed 150g of the drink). **BEWI DOG®** puppy milk is mixed with warm (60°C) water in a ration of 2:1 (e.g. 50g **BEWI DOG®** puppy milk plus 100g water = 150g of the drink). Add the powder to the water (not vice versa). Feed 5–6 times daily at the beginning, later 3 times daily.
